

ISHG Summer Internship Program 2024

Subject: Apply Now for Exclusive Summer Internships in Human Genetics!

Dear Students,

Are you passionate about delving into the mysteries of human genetics? Do you aspire to work alongside esteemed Scientists and Professors in the field? Here's your chance to make your dreams a reality!

We are excited to announce **two exclusive summer internships in Human Genetics**, tailored for enthusiastic students like you. This is an incredible opportunity to gain hands-on experience and invaluable insights in one of the most fascinating fields of science.

Internship Details:

- Duration: Two Months
- Stipend: Rs. 5, 000 per Month
- Eligibility: Applicants pursuing M.Sc. Second year (at least completed Semester II). The applicants need to secure an acceptance letter from a scientist or faculty in a regular position in a research organization or university and is a Life Member of the Indian Society of Human Genetics may apply.
- Students with an acceptance letter from the respective mentors, will be interviewed/ (Based on the project summary and the letter of motivation, candidates will be shortlisted. These shortlisted candidates will be called for an online interview by the ISHG secretariat). Finally **two** students will be selected for the award of internship.

Why Choose Our Internship Program?

- Expert Guidance: Work closely benefit from research mentors who are pioneers in the field of Human Genetics.
- Hands-on Experience: Get involved in cutting-edge research projects and practical laboratory work. Learn essential techniques and methodologies first hand.
- Networking Opportunities: Build connections with professionals and peers in the field. Expand your professional network and open doors to future opportunities.
- Career Development: Gain valuable skills and insights that will enhance your academic and professional journey. Add a prestigious internship experience to your resume.

How to Apply:

1. Reach out to a Scientist or faculty who is a Life Member of the Indian Society of Human Genetics. The acceptance letter from the Scientist or faculty must include acceptance to host the candidate at the institute including accommodation (on chargeable basis) throughout the duration of the internship (two months)
2. Secure an acceptance letter from the chosen mentor
3. NOC from Head of the Department of the parent Institution
